SUBJECT INDEX

Volume 110

Aircraft observations, 39, 69
Albedo, 471
Atmospheric
  surface layer, 141, 165, 191

Boundary layer
  budget, 99
  convective, 99, 381
  growth, 405
  models, 281, 319, 405, 435
  nocturnal, 255
  theory, 319
  winds, 281
Budget
  convection, 99
  methods, 99
Building geometry, 301
Bulk formula, 357

Canadian prairie, 455
Carbon dioxide, 3, 99
CASES-99, 255
Coherent structures, 191, 381
Convection, 435, 455
Convective boundary layer, 99, 381
Correlation function, 165
Cospectra, 213

Deep convection, 455
Dissipation method, 141
Dry convection, 435

Eddy
  covariance, 141, 213, 381
  diffusivity, 435
Energy
  balance, 213, 301
  fluxes, 3
Entrainment, 319, 405
Evaporation, 3, 99
Evapotranspiration, 69, 455

Flow over the sea, 141

Fluxes
  radiative, 301
  regional, 69, 99
  turbulent, 39, 99, 141, 213, 381
Forests, 213

Gobi desert, 471

Inertial dissipation, 141
Integral scale, 165
Intermittancy, 191
Intermittent turbulence, 255
Internal gravity waves, 255

Kolmogorov constant, 141

Land-surface interaction, 3, 39, 69, 99, 471
Large-eddy simulation, 381

Mesoscale circulations, 455
Mixed-layer model, 405
Mixing-length model, 435
MOST, 357

Nocturnal boundary layer, 255

OASIS, 3, 39, 69, 99

Radiative fluxes, 301
Regional fluxes, 69, 99
Rossby number theory, 319
Roughness length, 357

Similarity theory
  Monin–Obukhov, 357
  Rossby number, 319
Soil heat capacity, 471
Solitary waves, 255
Spectra, 165, 213
Structure function, 165
Surface
  albedo, 471
  conductance, 69

energy balance, 301
heat flux, 357
heterogeneity, 39, 99, 381
layer, 141, 165, 191
temperature, 357

Thermal roughness, 357
Transfer function, 213
Turbulent fluxes, 39, 99, 141, 213, 381

Urban canyon, 301

Wavelet transform, 191
Wind profile, 281
